

# Concannon Crossing Improvements

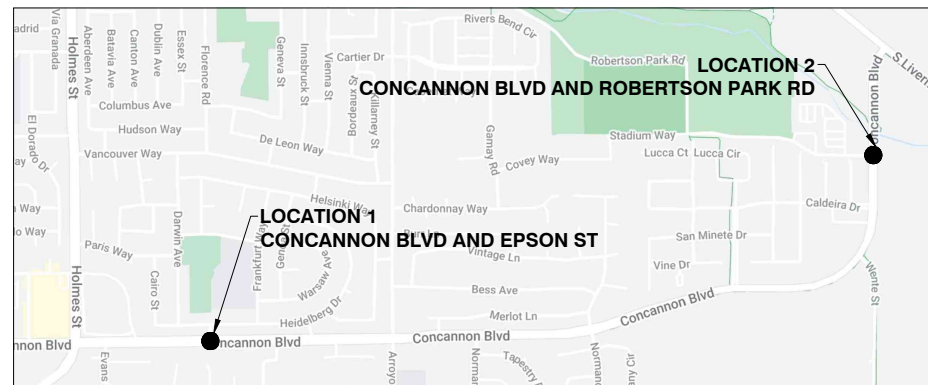

## Project Number 2021-35

August 16, 2023

The City of Livermore's upcoming  
Crosswalk Safety Enhancement project.

This project will be constructed with the use of Alameda County Transportation Commission (ACTC) administered funds (2000 Measure B).

This project will install improvements in order to further enhance safety for pedestrians on Concannon Boulevard at Robertson Park Road and on Concannon Boulevard at Epson Street.

### Purpose And Need:

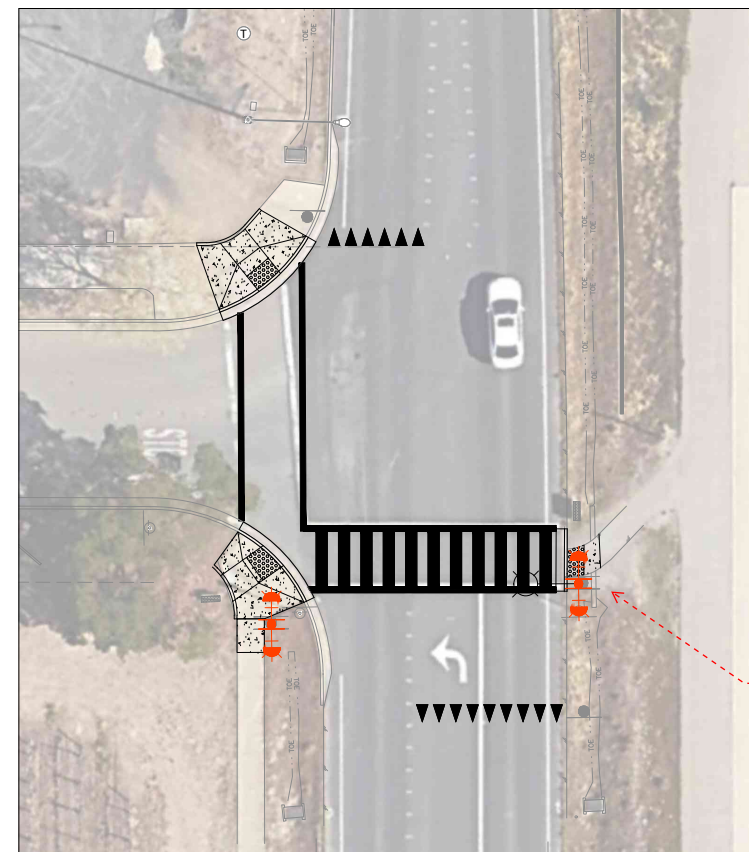

Concannon Boulevard is designated as a major roadway with an average daily traffic of 10,300 to 12,200 vehicles per day and a 35 MPH posted speed limit. The crosswalk on Concannon at Robertson Park Road provides direct connection for cyclists and pedestrians to and from the Arroyo Mocho Multi-Use Trail. Similarly, the crosswalk on Concannon Boulevard at Epson Street, provides direct access for children residing south of Concannon to Wentle Park and Sunset Elementary School located north of Concannon. Pedestrian crossing safety enhancements are needed to increase the level of comfort crossing both intersections.

**Pedestrian Facilities** - Proposed improvements at the Epson Street intersection include relocating curbs to add curb bulb-outs, Americans with Disability Act (ADA) ramps, signing and striping, and flashing red LED beacon to supplement the existing STOP signs. At the Robertson Park Road intersection, a new Rectangular Rapid Flashing Beacon (RRFB) system with pedestrian/bicycle actuation buttons together with a solar powered streetlight will be installed. Improvements to both intersections include improved intersection markings and signage and pedestrian ramps.

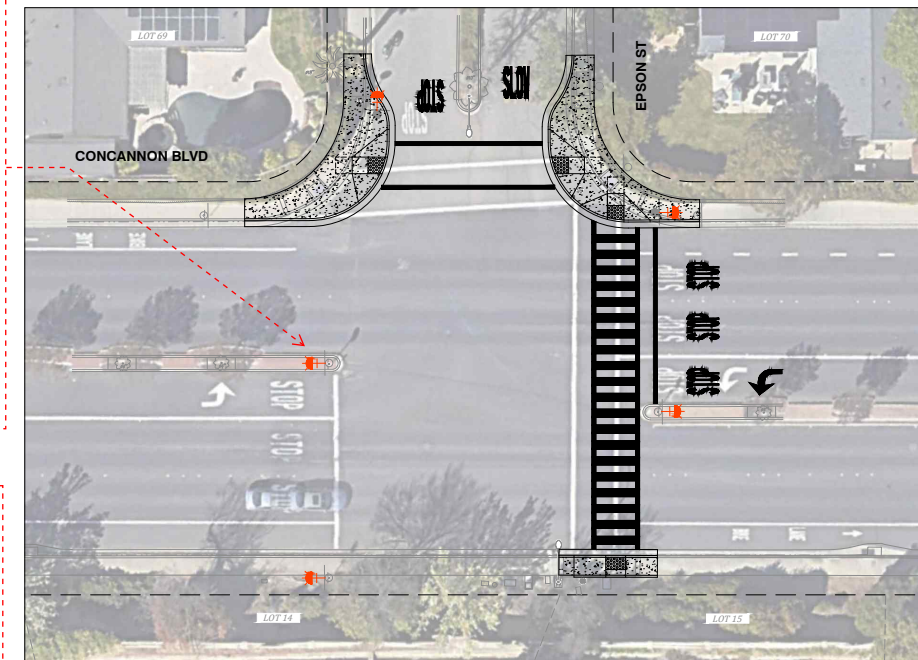

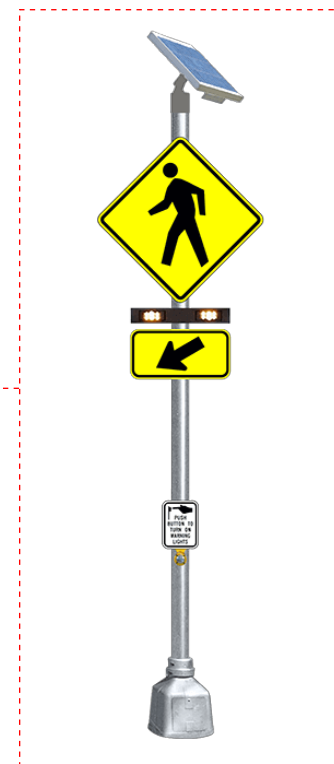

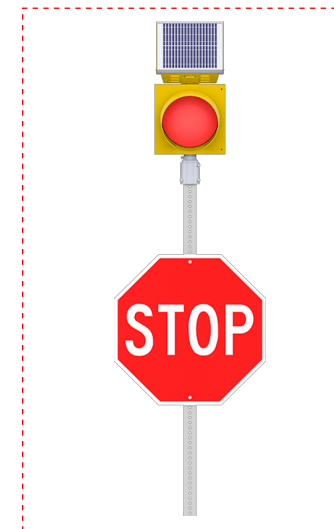

### THANK YOU IN ADVANCE

The City of Livermore thanks the neighbors and roadway users in advance, for their patience and cooperation as we continue to develop the design and proceed into the construction phase.

Please visit our website for project updates at
