

CHAPTER 14: LAWRENCE LIVERMORE AND SANDIA LABS

Although not within the City's jurisdiction, the Lawrence Livermore National Laboratory and the Sandia National Laboratories (the Labs) represent a significant component of the City's overall urban form. As a major destination point, the Labs' presence on the eastern edge of town significantly affects the character of travel corridors such as East Avenue, Vasco Road and Greenville Road.

GUIDELINE

The Labs are encouraged to work toward the attainment of the City's goals. For design guidance, please refer to Chapter 4, Industrial and Office, and Chapter 9, Streets.
