- Check

Notes: SFR = Single-Family Residential, MFR = Multi-Family Residential, C = Commercial, Business or Office.

In areas where multiple uses are located along a single segment, the most stringent (aka 60 dBA Ldn) standard applies.

Notes: SFR = Single-Family Residential, MFR = Multi-Family Residential, C = Commerical, Buisness or Office, NA = no currently developed sensitive use located along this segment. In areas where multiple uses are located along a single segment, the most stringent (aka 60 dBA Ldn) standard applies.

Note: In some cases, two segments represent the same roadway segment, but traffic volumes at each end of the roadway segment are different as a result of driveway access between the two intersections that is not specifically addressed in the traffic analysis.
